

Powerful EPoS

Lightweight on hardware,
heavyweight on features.

Reliable EPoS with unrivalled flexibility.

Built for purpose with lightweight hardware in mind to handle everything from boutiques and sole traders to fast-paced pop-up festival bar service, TouchPoint lite is designed to give businesses of all shapes and sizes a streamlined, flexible option that's not only easy to set up, but also easy to use.

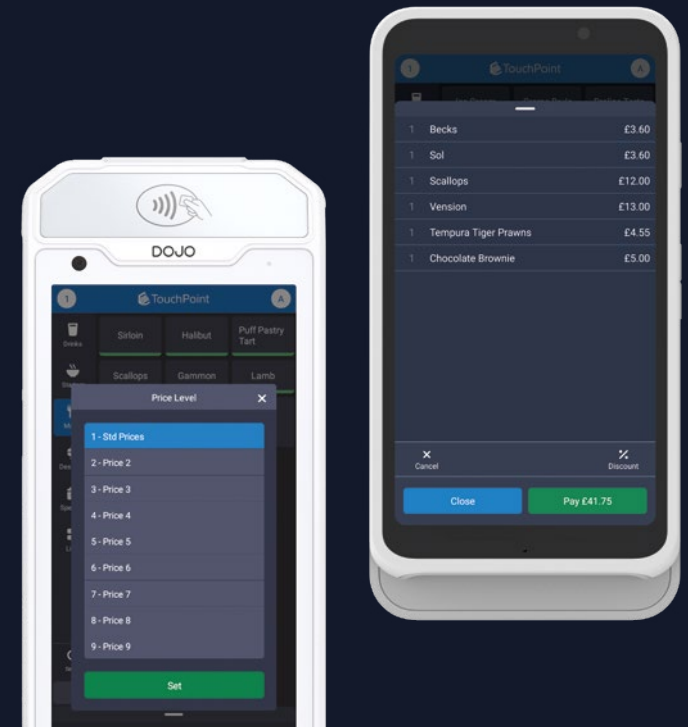

Whether setting up in a street food outlet, a festival bar, independent hairdressers, or even pub garden, there are hardware options to suit every business. TouchPoint lite has been built for purpose to work on hand-held, smaller devices such as tablets and phones. With full cash drawer, receipt printer, barcode scanner and kitchen printer support, you can configure a setup to work for your business.

Industry leading all-in-one.

Take control of your entire operations seamlessly via a single lightweight device.

If you're looking to streamline operations even further, and want an all-in-one EPoS solution that's as portable as possible and can provide a completely cashless operation, opt for an integration with one of our reliable payment suppliers. Integrating to hand-held devices means you can take orders and payments on one single device, significantly speeding up service and improving overall customer experience.

Gift cards and vouchers

Entice customers with comprehensive loyalty schemes thanks to enhanced gift card and voucher functionality.

Allergen alerts.

TouchPoint lite can provide complete allergen information for all products with handy on-screen alert messages.

Remote updates.

Utilise the integration with TouchOffice Web back-office to remotely update stock, products, prices and more.

Transaction history.

Use the calendar to view past transactions, run reports, check journals and reprint receipts easily on-device.

Cash drawer support.

Integrate TouchPoint lite with a cash drawer to offer cash, card and contactless payment options.

Security features.

Remotely de-authenticate any device, giving you complete security control if devices are ever misplaced.

User-friendly functions.

Sales, refunds, discounts, receipts and allergen alerts. All the vital EPOS functions are built-in and easy to use.

Printed receipts.

Toggle on the option to print receipts and tax receipts for every transaction, or view past transactions to reprint.

Multi-device.

Choose the device that works best for you - an all-in-one payment terminal, tablet with stand or a smart phone.

Product search

Speed up the order taking process by quickly and efficiently searching for specific products.

Connectivity.

No need for complicated network configuration, TouchPoint lite operates with both WiFi and 4G connectivity.

Scalable.

TouchPoint lite can be scaled to hundreds of devices making it the perfect tool to use at large events.

Make informed business decisions with reporting.

As well as all the standard functions you need from your EPoS solution, TouchPoint lite has intelligent reporting built-in, meaning you can access business data in the palm of your hand.

Easily complete on-device mid-day and end of day reports, with the option to print these as you need. Via a handy calendar view, journals and historical transaction data can also be viewed on the devices, with the ability to reprint receipts with the click of a button.

Journals can all be downloaded to the devices individually, but when you're looking for more in-depth reporting, TouchOffice Web will give you real-time access to a wealth of business, product and clerk data and reporting options.

Print and scan with simple integration.

Designed with streamlined efficiency in mind, TouchPoint lite offers built-in barcode scanning functionality, meaning staff can quickly and efficiently scan products and add them to the customer's basket, reducing mistakes and significantly speeding up the ordering process, perfect for retail outlets.

For hospitality based setups, send orders straight to the kitchen printers at the click of a button, instantly notifying kitchen or bar teams, making the solution the perfect tool for keeping on top of orders in high footfall environments.

The ability to scan barcodes and send orders to kitchen printers provides users with even more flexibility to operate TouchPoint lite in a configuration that suits their style of operations the most.

Streamline your operations with one simple, fully integrated ecosystem from ICRTouch.

TouchPoint lite integrates seamlessly with the TouchOffice Web back-office management solution, making it the perfect starting option for businesses who want a lightweight EPoS, with the flexibility to expand.

TouchPoint lite is the ideal stepping stone to a full version of TouchPoint with a wealth of additional features and functionality. From there, TouchPoint's EPoS solution will integrate across every aspect of your business, from reservations, digital ticketing and app ordering, to kitchen order management, digital signage, kiosk ordering and comprehensive loyalty schemes.
